COME TO BERLIN

AN OFFER

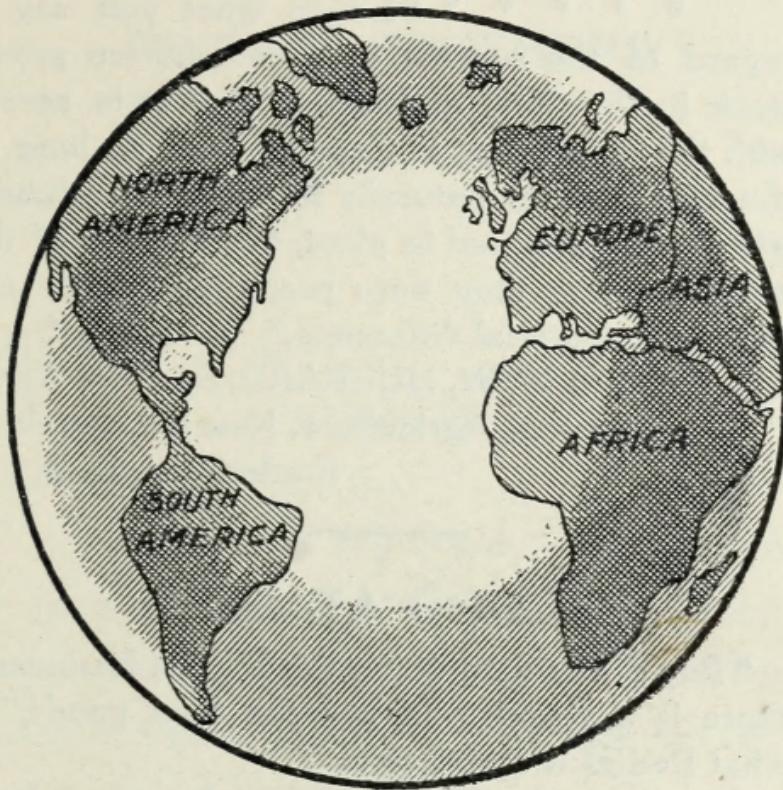

BY far the best way to buy trees is to select them for yourself at the Nursery. Take our word for it, it will pay you to come to Berlin. We want you to see what we have growing, and we assure you that you will not regret having spent a few hours with us in looking over our more than twenty-five hundred acres planted to Nursery stock.

WE WILL PAY YOUR
HOTEL BILL WHILE HERE.

HARRISON'S TREES SUCCEED ANYWHERE

Messrs. J. G. Harrison & Sons
Berlin, Md.

Dear Sirs:

* * * * * "I note what you say in regard to the success of your southern grown stock in the State of Maine. This is in accord with the experience in Canada—that so long as the varieties are naturally hardy to the climate where it is proposed to plant, the location of the nursery where they were propagated does not make any material difference." * * * *

(Signed) W. W. HUBBARD, Sec'y for Agril.,
Dept. of Agriculture, New Brunswick,
Fredericton, N. B.

GOOD ADVICE

"Buy of the man doing the biggest business—there is a reason—he has the best goods," is what Daniel Webster said.

He was right; the nursery firm supplying superior stock gets the most trade. That is why we are enabled to produce and sell our millions of trees every year.

HEALTHY TREES WITH BIG ROOTS

Our loose, sandy loam, our ten degrees higher average temperature than inland points have, and our salt and moisture laden winds from off the Atlantic are as efficient as ever in developing big roots and branches and insuring freedom from plant troubles. The superiority of our stock is not accidental.

FRIEND BROTHERS MANUFACTURING BAKERS

LOWELL, LYNN, MELROSE, MASS.

Harrison's Nurseries,

Berlin, Md.

Gentlemen:

Out of all the trees which you sent us this spring only about 1-2 doz. did not start. So there must have been 1494 trees which did grow and while some look better than others on the whole they are the best looking lot of young trees we have ever seen.

Yours respectfully,

Friend Brothers

Melrose, June 28, 1912.

—“only about 1-2 doz. did not start—they are the best looking lot of young trees we have ever seen.”

THE PROOF

*From a New Jersey Man
Who Knows*

Vineland, N. J.

June 27, 1912.

J. G. Harrison & Sons,
Berlin, Md.

Dear Sirs:

Within the last three years, I have handled about six carloads of your nursery stock and it has given both myself and my customers good satisfaction.

I do not think that the losses has averaged 1%. My own orchards are planted with your stock; the first trees were planted in the Spring 1904 and bore a fair crop the third year. That orchard of about 500 trees has never missed a crop since coming into bearing and has produced a good yield.

I now have 25 acres planted and about 20 acres are in bearing and I do not know of a single tree not true to name.

Your trees are adapted to this latitude. I prefer your stock on that account in preference to trees grown further north or south.

I think I will have good orders for Fall delivery.

Yours truly,

Ex Purcell

"I do not think that the losses averaged 1 per cent.—bore a fair crop the third year—I do not know of a single tree not true to name."

FRUIT, HAY AND PRODUCE

SEWELL, N. J., R.F.D. No. 2, June 18, 1912.

Harrison's Nurseries.

Berlin, Maryland.

Dear Sirs:

On October 1, 1908, I purchased 4500 peach trees from your nurseries. These trees nearly all lived and at this date have a fine crop for the coming season. Your trees are well adapted to the soil of the State of New Jersey.

In November, 1911, I purchased 5000 more trees of your stock. They are starting nicely and I recommend your stock to be healthy and true to name.

Yours truly,

J. H. Porch.

—“*trees nearly all lived—have a fine crop—well adapted to the soil—healthy and true to name.*”

THE PROOF *From a New Hampshire

THE PROOF *From a Maine Man Who Knows*

Pleasant View Orchards

A. L. Blaisdell, Prop'r.

WINTERPORT, ME., June 1st, 1912

J. G. Harrison & Sons,

Berlin, Md.

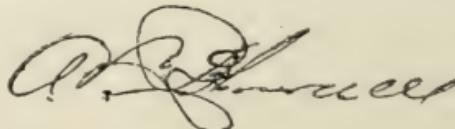

Gentlemen:

I am writing you today to congratulate you on the fine quality of apple trees that you have sent me in the last three years. I find they have proven much hardier than the New York stock that has been set right in this vicinity.

It was prophesied by all the "wise heads" that they would all freeze to death coming from the South into this climate. We have it as low as 40 degrees below zero here at times in the winter which will try out any stock, and if there is any weakness in them you can bet it will show itself.

Out of 2600 trees set last season there is only three dead trees, while in orchards where they set New York stock they lost from 10 to 20% of the trees set. I shall want for setting another season about 2500 trees and can assure you that your stock is the one I am going to set. This will make me about 11,000 trees, mostly from your nurseries.

Yours respectfully,

—“hardier than New York stock—40 degrees below zero—your stock is the one I am going to set—11,000 trees.”

ATTORNEYS-AT-LAW
KEYSER, W. VA.

Keyser, W. Va., May 21, 1912.

To whom it may concern:-

Within the last six years I have bought either personally or in connection with Companies in which I am interested, over 100,000 apple and peach trees from the firm of J. G. Harrison & Sons, Berlin, Md., and have always found their stock to be as represented. I have further found that stock grown and sold by them is well adapted to our soil and climatic conditions in this State. Have further found that the firm is always ready to do the square thing concerning any goods bought from them.

Very respectfully,

O. A. Hood

O.A.H./L.W.

square thing.”

THE PROOF *From a Pennsylvania Man Who Knows*

JOS. W. ANDERSON
—
DEALER IN
HIGH GRADE APPLE LUMBER

STEWARTSTOWN, PA., May 15, 1912.

J. G. Harrison & Sons, Proprs.,
Berlin, Md.

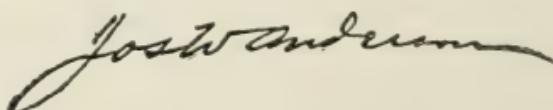

Dear Sirs:

The trees that I purchased from you in the Fall of 1909 are growing fine. The peach trees are now well set with fruit (many orchards in this locality haven't a peach owing to last winter's cold) and will average a spread of from six to nine feet. One especially fine tree of twenty-four month's growth in the orchard has a spread measuring ten to twelve feet.

The apple and ornamental hedge fence and trees for lawn are growing fine and I must say all my trees purchased from you are doing well, none showing effects of the very severe winter, when we had twenty-two degrees below zero.

A word for the nurseries which I have had the pleasure of visiting. It is simply a grand display of all things for beauty, profit and pleasure. The Proprietors are men of equally good growth in fair and honorable dealings.

Yours truly,

—“none showing effects—severe winter—twenty-two degrees below zero—fair and honorable dealings.”

THE PROOF *From an Ohio Man Who Knows*

B. F. SMITH

Grower and shipper of
PEACHES

R. D. No. 1 PORT CLINTON, O.

PORT CLINTON, O., May 24, 1912.

Messrs. J. G. Harrison & Sons,
Berlin, Md.

Gentlemen:

I am located in the northern part of Ohio on what is called "Catawba Island in Lake Erie."

I have your trees in bearing and think they have done better for me than home grown trees. They get ripe earlier than trees grown in Ohio and they will stand the winter better. Here in Ohio the trees, most of them, have to be stripped of their leaves when digging time comes.

As far as the fruiting of your trees is concerned, I think they bear better than the northern grown stock. I have Elbertas that have been bearing since two years old and they are loaded this year. I have had better success with your trees than those purchased anywhere else, and I can make ninety-nine out of a hundred grow. In all the trees that we have had from you I have never found any diseased trees, so I can safely recommend them to all.

Yours respectfully,

—“get ripe earlier than trees grown in Ohio—stand winter better—bear better—can make ninety-nine out of a hundred grow.”

THE PROOF *From a Michigan Man
Who Knows*

Eaton Rapids, Mich., June 3rd, 1912.
Messrs. J. G. Harrison & Sons,
Berlin, Md.

Gentlemen:

I want to say that my opinion of your stock is I have never seen cleaner, healthier or thriftier stock from any nursery in any locality.

As to the adaptability to this section, it has been my experience and observation that the best place to propagate a tree or any other plant, was that in which it grew best. The young trees certainly could not grow better than they do with you.

The Northern Spy tree in Michigan will be a Michigan Northern Spy no matter where the tree was propagated, and the better start it has in the Nursery the better tree it will make after planting.

I might add that I have found your firm both liberal and honorable. You were sold out of one variety of apples I wanted last spring and that convinced me I could depend upon your trees being "True to Name." I am a bit suspicious of Nurseries who are never out of any variety.

I expect to place an order for about two thousand apples and some other fruits for spring of 1913.

Very sincerely,

Frank E. Ford

Secty. Eaton Company Hortl. Society.

—“never seen cleaner, healthier or thriftier stock from any nursery—a bit suspicious of nurseries who are never out of any variety.”

W. E. FITCH
GROWER OF
**STRAWBERRY PLANTS
THAT DO BUSINESS**

BOX 406, NIAGARA FALLS SOUTH, ONTARIO, CANADA

May 25th, 1912.

Messrs. J. G. Harrison & Sons,
Berlin, Md.

Gentlemen:

I have great pleasure in stating that the stock from your Nurseries which I received and planted on my place has done well, especially the apples. The apples are the Ben Davis variety and have made a wonderful growth.

Occasionally you will talk with a man who has an idea that trees bought from the South will not do as well as northern grown trees. Your representative, Mr. P. C. Squires, saw these trees himself and made the remark that he wished he could photograph some of the Ben Davis apple trees after being planted two years.

I have some wonderful strawberry beds and had the honor of first introducing in this state the "Parsons" variety from your nurseries through your Mr. P. C. Squires, who I think is the right man in the right place.

I have also heard from several fruit growers who have received your trees in this section. They all seem to be well satisfied with the quality of the goods.

Sincerely yours,

W E Fitch

—“several fruit growers—received your trees—all seem to be well satisfied with the quality.”

OUR TREES

Are *free from all diseases; they are true to name—We Grow Them.*

VALUABLE FARMS FOR SALE

WHAT is known as "The East Shore" of Maryland is an old settled section; some of the richest plantations of all times since America was settled have been right here, and the lands granted to Lord Baltimore by the King of England are now as they were 200 years ago, the "Cream of the Country."

Here there is room for progressive farmers to make big successes.

WRITE FOR OUR *LIST OF FARMS*
AND THE BOOKLET
"THE LAND OF EVERGREENS"

Our New Catalog Free

Send your request for a copy now, as the edition is limited. Contains more vital information this year than ever, and should be in the hands of every man who buys trees or plants of any kind. Tells where each important variety does the best, explains the influence of elevation and latitude and gives plans for planting, etc.

"How to Grow and Market Fruit"

The book that tells how to start growing fruit and keep going—nearly 150 pages, 24 pages of pictures. From selecting the orchard site through all the processes of producing immensely profitable crops of fruit, the directions are clear and complete. It tells you what to do, when to do it, and why it should be done. With this book no expensive mistakes should be made. Free with orders amounting to \$5.00 or more. Otherwise the price is 50c rebated on first \$5.00 order.

"The Why and How of Shade Trees and Evergreens"

If you knew a row of Norway Maple shade trees a mile long would bring you in over thirty-eight thousand dollars during the next forty years, wouldn't you plant them? The sum named actually is the average cash value of a hundred and thirteen such plantings. Learn how these trees became so valuable and how you can grow trees that pay as well. You may not have a mile of space, but the returns are in proportion for smaller planting. The whole story is told in our new booklet "The How and Why of Shade Trees and Evergreens." We will be glad to send you a copy free.

FROM THE AMERICAN FRUIT CULTURIST
RECEIVED
NOV 7 1912

Dear Sir:

NOW IS THE TIME for you to arrange for your stock for Fall or Spring planting. By getting your order to us early we will be sure to have the varieties you select.

MAKE YOUR SELECTION from the enclosed price list. Upon request our 1912 illustrated catalog will be mailed to you free of charge. It is full of information valuable to fruit growers.

OUR PRICES are all f. o. b. Berlin, Md., discount 5% allowed on orders accompanied by cash. Boxing and baling FREE to retail trade.

HAVE YOU READ OUR LATEST PUBLICATION, the fruit growers guide book, "How to Grow and Market Fruit"? Invaluable to fruit growers. Free with orders amounting to \$5.00 or more--otherwise the price is 50¢, rebated on first \$5.00 order.

WE HAVE NEARLY THREE THOUSAND ACRES planted to nursery stock, and guarantee our trees and plants to be true to name and free from disease.

SPECIAL QUOTATIONS on large orders. Submit to us at once a list of your wants, and don't forget to ask for a copy of our catalog.

Very truly yours,

J. G. HARRISON & SONS.
